

Applying for a Conditional Use Permit

The term “conditional use permit” refers to a land use which would not be permitted under the normal regulations of a zoning district, however the proposed use may be made acceptable within the zoning district if development of the use complies with special conditions provided by the Planning Commission. Specified conditions and development plans associated with a conditional use permit (CUP) may only be amended by the Planning Commission. The conditional use permit is revocable by the City if any of the conditions are violated.

Overview:

Conditional use permit applications are reviewed by the Planning Commission and staff to determine compliance with the following city code:

17.52.060 Determination.

The planning commission may permit a conditional use to be located within any district in which the particular conditional use is permitted by the use regulations of this title. In authorizing any conditional use, the planning commission shall impose such requirements and conditions as are necessary for the protection of adjacent properties and the public welfare. The planning commission shall not authorize a conditional use permit unless the evidence establishes:

- A. That the proposed use of the particular location is necessary or desirable to provide a service or facility which will contribute to the general well-being of the community and the neighborhood;
- B. That such use will not, under the circumstances of the particular case, be detrimental to the health, safety or general welfare of persons residing or working in the vicinity, or injurious to property or improvements in the vicinity;
- C. That the proposed use will stress quality development with emphasis towards adequate buffering, landscaping, proper parking and traffic circulation, use of appropriate gradation of building height away from single-family districts and density to create privacy and compatibility with surrounding uses, use of building materials which are in harmony with the area, impact on schools, utilities and streets;
- D. That the applicant may be required to provide such reports and studies which will provide information relating to adequate utilities, traffic impacts, school impacts, soil and water target studies, engineering reports, financing availability, market considerations, neighborhood support and any other information which may be needed in order to render a proper decision.
